

8 March 2024

Dear Parent/Guardian

As you are aware, Year 12 pupils will sit their GCSE examinations in just a few months. The results from their mock examinations will have given pupils a good indication of their current progress and where best to target their revision.

We understand that sitting GCSE modules is challenging and pupils do best when home and school work together in partnership to provide support. In school, teachers are working to guide students in their preparation for these examinations and we know that you will want to help and motivate your child at home.

To provide you with some additional techniques and resources that you can use to help your child prepare for the upcoming examinations, we are holding a Parent Study Skills Information Evening on Thursday 14<sup>th</sup> March 7.00pm – 8.30pm. Initially arranged for parents of Year 11 pupils, we have decided to open the event to Year 12 parents as well as we feel this could be of benefit.

The evening will be led by Paul Gray of Learn Spark and is sure to be informative and entertaining. (Please see attached flyer.).

If you would like to attend the Parent Study Skills Information Evening you can register your attendance on the Gateway App. There is no charge for this event.

I look forward to seeing you there.

Yours sincerely

Dr CA Larmour  
Vice Principal
